

Given that all life begins and is sustained by His omnipotent and omnipresent Will, God is good.

Our oversight, as human beings, is that we do not give Him enough credit for His love and forbearance.

Denying His existence, many chose to ignore the fact that modern science is the discovery of His divine design.

Is their denial that God exists, they fail to recognize that every heartbeat and every breath they take comes from God.

Seasons come and go according to God's decree, not by the whims of man's desires,

God is not dependent upon the whims of man for His existence, rather the race of man cannot exist without the sanction of God.

Our very existence is dependent on the fact that God designed and desired that all things be brought into existence by His omnipotent Will.

One fact is true and as such undeniable, God has no dependency on the existence of the creations He has brought forth, but all things depend on His forbearance.

Deny God nothing, for in truth, everything that man cannot offer God falls far short of the wondrous creations He caused to exist.
